

Put a friendly face on scary situations.

We've never met a parrot for parrot, we couldn't make one with these **medical must-haves.**

AWESOME TIP!
Wearing a parrot mask can help distract and calm a patient's nerves. It's also a great way to protect your back and feet!

Rapidly Reveal® Pediatric Urinary System
This is a colorful, easy-to-use urinary system for children. It's made of soft, flexible material and is safe to use. It's also a great way to teach children about their urinary system.

Oral Temperature Probe (Oral Thermometer)
This is a digital oral thermometer that is designed for children. It's easy to use and provides accurate temperature readings.

Parrot Mask
This is a white parrot mask that can be worn by children. It's a great way to make a scary situation less scary.
